"WHERE GREAT KIDS LEARN GREAT THINGS"

Lydia Johnson
Principal

Jennifer Mathieu
Assistant Principal

To Whom it may Concern,

9/5/12

This letter is in response to Lil' Iguana Live that visited our school. I called the Lil' Iguana Children's Safety Foundation because of a very tragic experience. Last summer, one of our children was murdered and left in the Connecticut River. She was a bright, beautiful, 11 year old little girl. She was persistent in her studies and worked as diligently as any student I have ever taught. She loved to dance and sing and she was very excited about starting in the fifth grade. She had dreams of a big high school and many new friends. This was all taken from her. Our school will never be the same but we will continue to do our best to create a safe learning environment.

We must support programs like the Lil' Iguana; we must be proactive and reach children before they are faced with danger. Lil' Iguana Live came to our school and taught our children with music and an interactive live show. They gave us materials to educate all of us about how to be proactive and protect ourselves. Their program is so important to the safety of all children. I sincerely hope that they can continue to bring this safety message to more children; for many children, their lives depend on it.

Respectfully,

Lydia Johnson, Principal
